Curriculum and Assessment Policy Unit, Department of Education and Skills Marlborough Street Dublin 1

To: Boards of Management, Principal Teachers and Teaching Staff of Second Level Schools and CEOs of ETBs

Assessment Instruments (including tests and web-based resources) approved for use for guidance and/or learning support in post-primary schools from May 2015 until further notice

Circular Letter 0034/2015

1. Introduction-Purpose of this circular

This circular provides a list of assessment instruments, including ability and achievement tests and web-based resources that are approved for use in guidance and/or learning-support contexts in post-primary schools.

The tests listed below should be used along with other forms of assessment, for the purpose of informing actions that best address students' learning needs. The circular also provides clarification in relation to the selection and administration of the assessment instruments, the interpretation and retention of assessment information, and the provision of feedback.

The list of assessment instruments is designed to serve as a guide for schools. While the list is based on the most up-to-date information available, it is not intended to be prescriptive or exhaustive. Other assessment instruments which are not listed may also be used if deemed appropriate to identify students' needs.

2. Types of assessment instruments

<u>Standardised ability tests</u> (sometimes referred to as psychometric tests) are designed to be curriculum-independent and measure more enduring and long term traits than the attainment of learning, that is, they measure what a student is capable of knowing rather than what is known.

<u>Standardised achievement tests</u> (sometimes referred to as attainment tests) measure what a student knows and can be used to assess, for example, students' knowledge and skills in literacy and numeracy, and to determine progress in these areas¹.

¹ As part of the new Junior Cycle, the use of full-cohort standardised testing of English, Mathematics and Science in English-medium schools in second year and of Irish, English, Mathematics and Science in Irish-medium schools is being considered. It is envisaged that these tests will be phased in over a period of time.

On foot of information garnered from various assessment practices including ability and achievement tests, further information may be gathered through the administration of diagnostic tests to provide a more detailed view of a student's learning strengths and needs.

<u>A diagnostic test</u> is designed to provide specific information about a student's strengths and needs in some aspect of learning, for example, word identification skills or understanding of number concepts.

In addition, guidance counsellors may use the outcomes of ability and interest tests to guide and to support students' decision-making regarding subject choice and senior cycle programme options and to support their career development, including planning for higher education and/or further education and training.

3. Selection of assessment instruments

Schools should only use assessment instruments which are appropriate and have a clear and defined purpose. In particular, care should be taken in relation to the suitability of the assessment instruments that are used with students with special educational needs (SEN) or with students who are studying English as an Additional Language (EAL).

Assessment results should not be regarded as definitive. Students' needs and other contextual information should always be taken into consideration.

Care should be taken by users to research accurately the suitability, reliability and validity of all assessment instruments selected for use, and to ensure that the versions in use are the most up-to-date. It should also be noted that not all instruments available for schools have Irish norms, and some have not been revised for a number of years.

The use of assessment instruments in schools for the assessment of personality is *not* appropriate and therefore such instruments do not appear in the list below.

Test administrators are advised to examine closely the test manuals and any other supporting information before selecting a test. Where necessary, the publisher of the test may also be contacted for more detailed descriptive information. The National Educational Psychological Service (NEPS) and the National Centre for Guidance in Education (NCGE) also provide information and advice on the use and appropriateness of certain assessment instruments. See the list of useful references below.

Engagement between primary and post-primary schools will inform decisions around the selection and timing of assessments for students new to post-primary education. The *Education Passport* supports the sharing of relevant data, including assessment results, as students transfer from primary to post-primary school. Further information on the *Education Passport* can be accessed on the NCCA website at www.ncca.ie or in Primary Circular 0027/2015 at www.education.gov.ie.

4. Administration of assessment instruments

Information should be provided to parents and students regarding the purpose of the assessment and the consent of parents and students should be obtained in advance of the assessment instrument being administered.

Some assessments, such as standardised group achievement tests, can be administered by subject teachers while others may require teachers to possess additional qualifications.

Diagnostic tests should only be administered and interpreted by appropriately qualified personnel depending on the nature of the diagnostic instrument used.

The administration of ability tests in schools should be restricted to appropriately qualified personnel who have been specifically trained in specialised psychometric testing including the selection and administration of such assessment instruments, interpretation of assessment results, scoring and feedback. Typically in the case of psychometric instruments of general ability (and individually administered achievement tests), such personnel will be qualified guidance counsellors or have other appropriate qualifications. Both NEPS and NCGE provide guidelines on best practice in psychometric testing which are available at:

http://www.education.ie/en/Schools-Colleges/Services/National-Educational-Psychological-Service-NEPS-/neps_post_primary_continuum_resource_pack.pdf and

http://schoolguidancehandbook.ncge.ie/document-detail/Best-Practice-Ethical-and-Legal-Considerations-in-Psychometric-Testing-for-Guidance-Counsellors/39

In using assessment instruments, schools and, in particular, appropriately qualified teachers should pay due attention to the requirements of the current legislation, particularly the Data Protection Acts 1988 and 2003 and the Department's Circular (Ref: Circular DPAEd 3/89: Data Protection Act 1988). For additional information, also see:

http://schoolguidancehandbook.ncge.ie/document-detail/Data-Protection-for-the-Guidance-Counsellor-Issues-to-Plan-for/3 and www.dataprotectionschools.ie

When administering online/electronic assessment instruments, schools need to be cognisant of data protection considerations, for example, who controls and has access to outcomes data, the purposes for which these data will be used, and the retention and storage of the data.

5. Interpretation of assessment instruments

In planning interventions to meet a student's needs, the results of assessment instruments should be used in conjunction with other information available on the student.

As highlighted in the National Educational Psychological Service (NEPS) publication *A Continuum of Support for Post-Primary Schools: Resource Pack for Teachers*, 'results of any one test should not be considered in isolation and tests results should always be considered alongside other information: parental information, information from the primary school, information from teachers etc. ... Additionally, schools need to be aware of the risks associated with early labelling, which may place a ceiling on expectations or consign students to particular groups' (p.40).

In addition, as highlighted in the NEPS publication, schools and teachers should be aware of the 'very particular difficulties associated with the assessment of children whose home culture is markedly different from the group on whom the test is standardised. This may be a factor and should be considered when considering results for Traveller children or children who are newly arrived from cultures outside of the western world' (p.39). Care should also be taken

when interpreting results for students who are studying English as an Additional Language (EAL).

Decisions regarding the use of assessment instruments and the sharing and interpretation of assessment data should always be made in accordance with the school's assessment policy, the school's data protection policy and in accordance with best practice on test administration and usage.

6. Constructive feedback on assessment results

Schools should ensure that appropriate, accurate and constructive feedback is provided in a timely fashion to students and parents by appropriately qualified personnel, for example, guidance counsellors or other suitably qualified teachers. Students should be provided with the opportunity to explore their assessment results in the context of the educational options available to them in the school and to inform their future educational and vocational development, career choices and decision making. Students should be made aware of the limitations of assessment results during this discussion and the importance of other factors including the student's interests and experience, and information available from other sources.

7. Storing assessment data

Schools should be aware of obligations relating to access to stored data under the Freedom of Information Act 1997, the Freedom of Information (Amendment) Act 2013, associated regulations, and the Data Protection Acts 1988 and 2003.

8. List of useful references

ACHIEVEMENT TESTS: GROUP ADMINISTERED TESTS LITERACY (READING, SPELLING AND HANDWRITING)

The items in the list below assess a range of literacy skills including phonology, oral word reading, silent passage reading, reading fluency, reading comprehension, reading rate or speed, listening comprehension, spelling and handwriting. Decide the purpose of administration, i.e. what you want to find out, before you decide to purchase and use a test. Be aware that the majority of these instruments are developed and standardised in either the UK or the US and some may feature non-Irish cultural references or spellings. When possible, obtain a sample of the test and use the school's collective professional judgements to decide if the test will provide the information needed.

ACHIEVEMENT TESTS: GROUP ADMINISTERED TESTS MATHEMATICS

Please note that UK published maths assessment instruments may feature the imperial system of measurement and use sterling and not the euro and test participants should be advised of this. Practitioners should also note that these instruments relate to the UK curriculum and may have limited diagnostic value.
