Introduction of Occupational Health Service for Teachers

The Minister for Education and Science wishes to inform management authorities of the commencement with immediate effect of an Occupational Health Service for teachers to be provided by Medmark Occupational Healthcare.

The first stage in the development of the overall Occupational Health Strategy for teachers, the Employee Assistance Service, managed by VHI Corporate Solutions, was put in place at the start of the 2006/2007 school year. The second stage of the Occupational Health Strategy for teachers incorporates pre-employment health assessments, sickness absence assessments, medical assessments of fitness for work and ill health retirement. It is intended that both initiatives will help to create a supportive working environment for teachers and reduce the incidence of stress related illnesses.

Two booklets - Occupational Health Service Guide for Boards of Management/VECs and Standard Operating Procedures Manual for Boards of Management/VECs have been prepared in consultation with the Occupational Health Service provider to assist employers of teachers in accessing the service. The Occupational Health Service will be rolled out in two phases as set out below:

Both booklets are being printed at present and will issue in hard copy format in both English and Irish shortly.

In the interim both booklets can be accessed (English version only) on the Department’s website. Please read both booklets carefully and in particular note the changes to the process for assessing medical fitness prior to appointment as a teacher.

I trust the service will be of benefit to you and your staff.
